

WHAT MAKES US DIFFERENT?

Unlike other armored solutions on the market, Armorbloks are

MODULAR

LIGHTWEIGHT

DISCREET

With their **fully modular and lightweight** design, Armorbloks can be assembled by just one person with a screwdriver. This not only **reduces labor costs**, it's also **flexible and discreet** when it comes to rapid shelter deployment or adjustments to existing fortifications in critical areas.

MILITARY & GOVERNMENT USE CASES

POLICE STATIONS & SCHOOLS

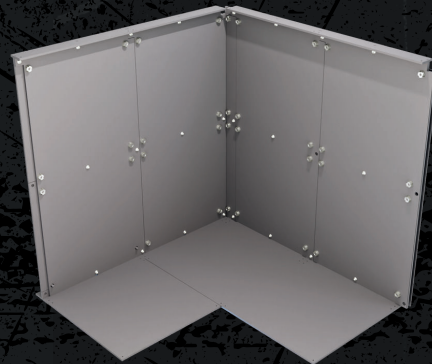

Public buildings have been prone to more assaults and riots every year. Simply installing Armorbloks can reduce damage to facilities and save lives.

GOVERNMENT BUILDINGS & FACILITIES

To protect sensitive data and personnel, our compact bloks can be discreetly retrofitted into existing government buildings without specialized equipment or machinery.

PERIMETER DEFENSE & SPEC OPS

Armorbloks' modular design allows for quick assembly in high-risk areas, creating structures that can stop any bullet, including .50 caliber and armor-piercing rounds.

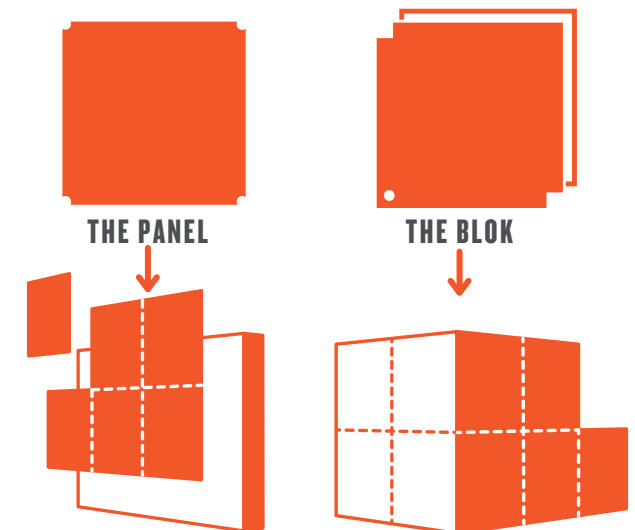

UL752 & MIL-DTL-46100 COMPLIANT

Our products are UL752 (rev. 12) compliant at all levels. The materials sourced are:

- MIL-DTL-46100 COMPLIANT
- APPROVED FOR MILITARY PROGRAMS

We provide **every level of bullet-stopping power**, available as retrofittable panels or freestanding modular walls.

- Fortifies existing walls/structures
- Fits into standard 16" stud spacing
- Builds into free-standing structures
- Has floor, ceiling, and corner options
